GlassWorks Crack For Windows is an easy-to-use application that can help you build a Splash Screen, with a preview option to show what you've done so far, and easy-to-use options to allow you to change the design of the window, icon, or external URL. This application is a three-time winner of "Best Free Splash Screen Creator" (Android Design Awards 2012, 2015, and 2017), and it's maintained by the same award-winning team, with support from AppCake. The Splash Screen Creator app takes a simple approach to building Splash Screens, but with no visual design tools, features like stickers, and logo color choice options aren't available. Moreover, the options are static and can only be used in a single-installation project (no templates or reusable components). That being said, GlassWorks Cracked Accounts will save you time, and still let you make the experience your own by allowing you to customize the window, logo, and external URL. We will talk more about that in the next section. If you're looking for a simple Splash Screen app, GlassWorks Download With Full Crack is a great option to consider, but keep in mind that it only offers one template for you to work with, and most of the options and customization features aren't even available. The app is free to download and try, with its official page redirecting to its official website that offers paid plans for larger projects. Moreover, it's only a two-time winner of "Best Free Splash Screen Creator" on Google Play, which just adds to the confusion, and means that this app is unlikely to get an update anytime soon. What's New Version 2.0.0 • Added preview option, with drag & drop templates. • Added 4 new event types. • Added options to view and export statistics.
