In 2009, AutoCAD was ported to the iPad as Autodesk Inventor, the first major overhaul of AutoCAD in more than a decade. Its aim was to make it easier for students and professionals to create 2D drawings. It was a success, and the 2009 release is still on sale on Apple's App Store for US$9.99. Other AutoCAD releases have included: AutoCAD 2001 AutoCAD 2002 AutoCAD 2004 AutoCAD 2008 AutoCAD LT for iOS AutoCAD 2011 AutoCAD 2012 AutoCAD 2013 AutoCAD 2014 AutoCAD 2015 AutoCAD 2016 AutoCAD 2017 AutoCAD 2018 In November 2011, Autodesk released AutoCAD LT 2011 for iPads, which is fully integrated with AutoCAD for the desktop version. An earlier version of AutoCAD was AutoCAD 1.0, released in 1980 for the Xerox Alto computer. AutoCAD 1.0 was an early instance of graphic user interface (GUI) development. AutoCAD 2009 is the first release of AutoCAD to support iPad and iPhone. It is a lot more than just an iPad-native version of AutoCAD. iPad is a key device for the implementation of some of AutoCAD's user interface (UI) features, for example the new 2D Drafting Window. Other key new features of AutoCAD 2009 for iPad are the 2D Viewer and Drafting Center, which allow iPad users to easily review existing 2D drawings, and the 2D Look-Up Panel and Measuring Tool, which simplify measurement and dimensioning. History The AutoCAD team announced in April 2011 that they were going to discontinue support for Windows XP systems. At the same time, AutoCAD LT for iPads, which they had first released in 2011, was updated to AutoCAD LT 2010. The 2010 version did not support the old working file format of AutoCAD for the Windows platform, so users were forced to either use AutoCAD LT 2011 or switch to Windows 7 or later. They also discontinued support for Windows Vista. This has created a problem for new users of AutoCAD. The new app is not backwards compatible and needs to be purchased again if the user switches to the new operating system. The release version

C++ based object-oriented programming includes the AutoLISP, Visual LISP and VBA language for automation. Microsoft's Visual Basic for Applications and Visual C++ can be used to create add-on applications, called "AutoCAD Plugins" that add AutoCAD-like functionality to AutoCAD. The ability to create AutoCAD Plugins is not included in the standard AutoCAD product. The C# programming language is based on Java and can be used to create add-on applications called AutoCAD Plugins which add AutoCAD-like functionality to AutoCAD. Mac OS and Linux AutoCAD has a Mac OS version of native "AutoCAD LT" for which there are plugins. AutoCAD LT is a limited-functionality product, including a subset of the tools available in AutoCAD, that is aimed at Mac OS users wishing to create basic drafting tasks. The native version does not support object oriented programming or most of the application's graphical features, but can still be used to create AutoCAD drawings. AutoCAD LT runs on Linux as a Windows program (since a Windows program can be run on any Windows system). AutoCAD LT is also available for Linux and various flavors of UNIX. AutoCAD LT 2009 is a new limited function product based on AutoCAD 2008. It only includes basic drafting tools. The new version also includes a number of changes to the user interface. To create a design in the new software, all the new features are disabled. Other Microsoft products AutoCAD LT 3D is a 2012 release of AutoCAD LT developed by Autodesk. Unlike its 2007 predecessor, AutoCAD LT 3D contains all features of AutoCAD LT and the user interface has been updated to support 3D drawing. In October 2009, Autodesk released AutoCAD 2009 for Windows. This product was based on the 2008 release of AutoCAD. The next release of AutoCAD, AutoCAD 2009, was released in September 2010. This product was based on the 2008 release of AutoCAD, with changes to the user interface, improved support for DXF file interchange, a number of updates to drawing tools, and more. Autodesk released AutoCAD 2010 in October 2010. This release was based on the 2009 release of AutoCAD. In April 2011 5b5f913d15
