GetRight is one of the powerful download managers on the market and it provides users with great download speeds and a well-organized interface. While not topping the ranks in terms of usage, it still packs a solid set of features that makes it a challenger amongst the more renowned Internet Download Manager, FlashGet or Free Download Manager. Compatible with popular web browsers GetRight's installation features options like take control of your downloads while browsing the web or create special categories for better management of downloaded files. GetRight is able to get along with the most popular browsers out there, including Internet Explorer, Mozilla Firefox or Opera. The interface looks clean, even though it does not stand out of the crowd. The window is split into two different parts, the one of the left that hosts a basic file organizer to easily find a certain downloaded file, and the right one that's exclusively addressed to managing the current downloads. Download from multiple sources GetRight has all the features you would expect from a capable download manager: pause, delete, schedule, shut down the computer and a bonus. The application attempts to speed up the download by searching for additional sources for a specific file and thus split the download into segments, each with its very own source. Customizable interface to suit any taste The download manager offers the right tools to customize everything about it. You can easily choose from multiple toolbars and buttons, report columns and speed graphs. It also features a configuration wizard for beginners as well as detailed settings such as 'Monitor Browsers', 'Speed Limit', 'Mirror Search', 'Accelerate' or 'BitTorrent'. Providing a great deal of safety GetRight provides users with customizable virus scanning of each download based on the available antivirus installed on the computer ensuring that whatever gets inside is clean. Last but not least, the application can also be configured to download podcasts automatically and add them into your playlist, regardless if you are using Windows Media Player or iTunes. A few last words All in all, GetRight gets the job done with flying colors. It has the proper tools to work with and all users will find it quite easy to use. Computers equipped with this tool can further make one's life easier with safe and organized download processes. IG_ZONE_LITE_MAIN is now on the market and it's based on the popular 3D game "Zone of Heroes". This new version of the game brings a major update concerning the 4.0 version with lots of improvements and

It is one of the most reliable download managers out there. If you are looking for a download manager, this one's the one. You can download GetRight Download Manager

System Requirements:

This game requires a GeForce 9600 GT or AMD Radeon HD 4650 or better, 128 MB Video RAM, 128 MB RAM, and a 2 GB hard drive space. Windows XP, Vista, and 7 are supported. If you have problems installing the game, we recommend the following fixes: Run the game and use the custom in-game settings to "Disconnect all controllers" and "Minimum settings". Then try the installation again. If the game fails to start up, first run the game and check the above custom settings.
