XIRR Calculator

Product Overview XIRR Calculator is a special calculator to help you calculate Internal Rate of Return (IRR) for various scenarios. The application generates IRR for the specified number of Cash Flows, Start and End date (works with any date format). Just enter cash flows, dates and interest rate and press Calculate. If the cash flow is positive, you may receive interest. If the cash flow is negative, you may not receive interest. You can enter up to 5 cash flows for any combination of dates. The application supports multiple rates of interest, but it is not limited to that (for instance 0% and 5%). The calculation will take all info into account and show IRR for the chosen scenario. 1. Download and unzip XIRR Calculator zip package and install it. 2. Click on XIRR Calculator icon to launch the program. 3. Using the calculator, enter all details as you like and run the calculation. Please make sure all values and dates are entered correctly. 4. You will see the XIRR results and can copy and paste it into your spreadsheet and/or editor for further analysis. 5. To quit the application, click on Exit button or press Alt-F4 in the main window. 6. Optionally, you can also export the XIRR table to Excel. Inputs: Multiple cash flows Start and End dates and interest rates Display: XIRR Calculator - As you can see, The application has many options, which are accessible by clicking on the buttons provided in the application. The application calculates IRR for the specified Cash Flows, Start and End dates (works with any date format). Just enter cash flows, dates and interest rate and press Calculate. 1. Download and unzip XIRR Calculator zip package and install it. 2. Click on XIRR Calculator icon to launch the program. 3. Using the calculator, enter all details as you like and run the calculation. Please make sure all values and dates are entered correctly. 4. You will see the XIRR results and can copy and paste it into your spreadsheet and/or editor for further analysis. 5. To quit the application, click on Exit button or press Alt-F4 in the main window. 6. Optionally, you can also export the XIRR table to Excel. Related Software Similar News Cardiac Cycle Calculator (

What's New In?

Calculates the internal rate of return on an investment in the face of periodic cash inflows and outflows. It is based on the assumption that the money received or used for investment today will be worth more or less than it would be in the future. XIRR Calculator (Serial Key) is a powerful financial forecasting program which has the ability to perform analysis based on at least 10 different cash flows. While XIRR is not very complicated, it is a smart and easy to use program. After installation, you will be able to enter your chosen cost of the investment, the amount of the cash flows, and an optional payment for the future. XIRR Calculator comes with a user-friendly interface, which allows you to perform in-depth analysis without any problems. The program is very easy to use, with intuitive commands. It also has a very convenient color-coded display, which allows you to make the most out of available information. This application is perfect if you need to calculate the internal rate of return of your investment. The program also has the ability to analyze the negative and positive cash flows separately, which can help you with more accurate results and a more understandable analysis. While some of the programs have the ability to analyze cost scenarios, XIRR can also handle this. However, the program is not entirely free from bugs, but this isn't a major problem for most users as it is a very easy to use application. XIRR Calculator download features: Advanced calculation: - Ability to analyze multiple cash flows - Ability to analyze positive and negative cash flows - Ability to analyze periodic cash flows - Ability to calculate the internal rate of return - Ability to analyze all the scenarios - Ability to perform analysis based on many different types of cash flows - Ability to analyze cost scenarios - Ability to customize the analysis - Ability to perform the analysis for multiple iterations - Ability to perform the analysis for multiple years The program comes with a very simple interface, which helps make it more user-friendly. This program is really easy to use, with a color-coded display and an intuitive interface. Most of the programs that analyze cost scenarios have the ability to perform the analysis for only one year. XIRR Calculator has the ability to perform the analysis for multiple years, which is a highly useful feature. The program comes with a

graphical timeline, which allows you to see how the results are obtained based on the specified cost of

System Requirements For XIRR Calculator:

Minimum: Mac OSX 10.7 or higher 1GHz processor 320 MB of RAM Recommended: Mac OSX 10.8 or higher 512 MB of RAM Mac OSX 10.5 or higher Windows: XP or higher 1 GHz processor Keyboard / mouse Audio playback software The game is optimized for a 60hz monitor refresh rate, but it may work with other monitor refresh rates.
